Practical Information

Optimal Seasons for Honolulu

Best Overall: April-May and September-November offer the perfect balance of great weather, fewer crowds, and moderate prices. These shoulder seasons provide warm temperatures (75-85°F), less rainfall, and availability at hotels and attractions.

Season Breakdown:

- **Winter (December-March):** Peak tourist season with highest prices and crowds. Temperatures 70-80°F. Best for whale watching (humpback whales migrate December-May). North Shore has massive surf competitions. Expect occasional rain showers. Book accommodations 3+ months ahead.

- **Spring (April-June):** Excellent weather with minimal rain. Perfect ocean conditions. Merrie Monarch Festival (April) celebrates Hawaiian culture. Graduation season brings local tourism. Increasing temperatures make beach activities ideal.
- **Summer (July-September):** Hottest and driest period (80-90°F). Japanese and US mainland tourists increase in July-August. Calmer North Shore waters perfect for swimming. Aloha Festivals (September) showcase Hawaiian music and culture. Hurricane season (June-November) rarely affects Honolulu directly.
- **Fall (October-November):** Bargain season with lowest hotel rates before holiday rush. Warm ocean temperatures linger. Halloween celebrations and Honolulu Marathon (December) draw visitors. Excellent snorkeling conditions continue.

Weather Patterns: Honolulu enjoys year-round warm weather with trade winds providing natural air conditioning. Rainfall is brief and localized, typically clearing quickly. Windward (east) side receives more rain than leeward (west) areas.

- **Respect Privacy:** Ask permission before photographing locals, especially at cultural sites. Never photograph inside temples without permission.
- **Drone Regulations:** Drones restricted in many areas including beaches, parks, and near airport. Check FAA regulations and state park rules before flying.
- **Equipment Protection:** Salt air and water can damage cameras. Bring lens cleaning cloth, waterproof bags. Rinse equipment with fresh water after beach shoots.
- **Composition Tips:** Include palm trees as natural frames. Use leading lines of waves or trails. Capture reflections in tide pools or wet sand.

Electricity & Electronics in Hawaii

Electrical Standards:

- **Voltage:** 120V AC (same as US mainland)
- **Frequency:** 60 Hz
- **Plug Type:** Type A (two flat parallel pins) and Type B (two flat parallel pins with round grounding pin)

Adapter Requirements:

No adapter needed if traveling from: United States, Canada, Mexico, most Caribbean nations, Japan (same voltage and plug type)

Adapter AND voltage converter required for: Europe, UK, Australia, New Zealand, Asia (except Japan), Africa, South America. Most modern electronics (phones, laptops, cameras) have built-in voltage converters (check device label for '100-240V'), so only plug adapter needed. Hair dryers, curling irons, and other heat-producing appliances typically need voltage converter if not dual-voltage.

Where to Buy Adapters:

- **Before Arrival:** Purchase multi-country travel adapter at home (cheaper and more selection)
- **In Honolulu:** ABC Stores (80+ locations in Waikiki), Target, Walmart, Best Buy, airport shops (most expensive option)
- **Hotel Front Desk:** Many hotels loan adapters to guests - ask at check-in

Device Charging:

- **USB Charging:** Widely available in hotels, cafés, restaurants, and public spaces. Bring your own USB cable and charging brick.
- **Hotel Rooms:** Standard US outlets throughout. Most modern hotels have built-in USB charging ports.
- **Public Charging:** Honolulu Airport offers charging stations. Some beaches and parks have outlets in pavilions (use at own risk).

Electronics Tips:

- Bring power strip/surge protector if traveling with multiple devices - hotel rooms typically have limited outlets
- Waterproof phone cases recommended for beach and water activities
- Portable battery packs essential for full-day excursions when outlets unavailable
- Most hotels offer safes for storing electronics and valuables
- Salt air can damage electronics - keep devices in protective cases when at beach
